

PRESS RELEASE

GLOBAL DEMAND FOR PARADIGM'S SWARM VSAT

SWARM Deployed Across 5 Continents During 2017

ALTON, UK – January 12 2017 – The rugged and lightweight multiband SWARM terminal from Paradigm has swarmed across the globe during 2017. Demand for this easy-to-use, high-speed VSAT has resulted in roll-outs and field implementations for requirements all over the world.

This active deployment in numerous locations for a wide range of customers positions the SWARM above other terminal solutions in the market. Its adoption by various user groups has been swift and is testament to the field-proven capability of the SWARM.

The SWARM packs into one case or backpack which is compliant as airline hand luggage and it can be setup in under 90 seconds. Commercially agile, it is configurable for Ka, Mil-Ka, Ku and X-Band frequencies and operational on a multitude of satellite constellations.

Looking ahead to 2018, customer demand is remaining strong.
