

PRESS RELEASE

PARADIGM SELECTED TO URGENTLY PROVIDE MULTIPLE VSAT SYSTEMS FOR PROJECT IN AFRICA

Fast turnaround by UK-based Paradigm Communication Systems for order of multiple VSAT systems for EU-funded African project

ALTON, UK – January 25th 2016 – Paradigm are in the process of shipping multiple VSAT systems out for an EU-funded project, which will serve over 50 countries in the developing African market. The African programme has been setup to enable improved management of the environment at continental, regional and national levels throughout the region.

Paradigm has Europe's largest satcom warehouse based in Alton, UK which has ensured a reliable and rapid response to this requirement; equipment for the first shipment was consolidated, individually crated, shipped and ready within a few weeks. The remaining order will be despatched over the next few months as per the project rollout specification.

Multiple complete terminals (2.4m and 3.7m antennas) are included in the requirement along with spare components and specialised RF components to enhance signal reception.

"We are pleased to have been selected for this key overseas programme. It highlights some of the value we provide to our customers – utilising our in-house engineering design and expertise to provide complete VSAT systems, organising project delivery to tight timescales and providing logistic services," said Laura Holloway, Head of Sales at Paradigm.
