

PRESS RELEASE

THOR 7 TYPE APPROVAL FOR PARADIGM'S SWARM45 KA-BAND TERMINAL

Swarm45 Receives Another Type Approval for a High Throughput Satellite Network

ALTON, UK – 08 February 2017 – Paradigm, an independent satellite communications solution provider, has received type approval for its unique flat panel Swarm45 Ka-Band terminal from Telenor Satellite, a major satellite provider of broadcast and data services throughout Europe and the Middle East.

The lightweight Swarm45 can be carried as airline hand luggage in either a hard or soft case or a backpack. It can be setup and operational in under 5 minutes delivering

impressively high data rates for its size over Telenor's THOR 7 and other High Throughput satellites (HTS). Designed around the PIM (Paradigm Interface Module) terminal controller the BGAN-like pointing process has been developed by Paradigm to ensure quick deployment by users with minimal training. The integrated audio and visual pointing cues provide a straightforward method of acquiring the THOR 7 satellite without the extra bulk of motors and controllers.

"The Swarm45's market opportunities have opened up even further with this approval from Telenor. This versatile little terminal is ground-breaking in the way it is simplifying satellite communications whilst still delivering proven high speeds and performance." said Ulf Sandberg, Managing Director at Paradigm.

“We are pleased that the Swarm45 terminal, the smallest terminal yet, has been approved to operate on THOR 7. The fact that it is so lightweight and compact makes it very attractive to our users” commented Lisa Barlow, Sales Director OU, Telenor Satellite.

The Swarm45 has already been swiftly adopted by the international military and government community for mobile and fast communication but is equally suited to the disaster recovery, NGO and broadcast sectors.

About Paradigm

Paradigm provides optimal, innovative and reliable satellite communication and control solutions at a competitive price.

Paradigm is a UK-based, independent and privately owned company with Europe's largest satcom warehouse. Incorporating an extensive logistics capability, Paradigm is able to deliver extremely efficient and cost-effective global services and unique solutions, from the provision of satcom equipment and terminals to the design and installation of complete turnkey systems.

Paradigm has extensive engineering experience designing and delivering customised satellite terminals and earth stations for a wide range of industries and sectors, developing close relationships with customers, and giving valuable insight into their key requirements.
