

PRESS RELEASE

PARADIGM'S GAME CHANGING SWARM45 TERMINAL

High Performance, Rapid Deploy VSAT

Paradigm is excited to be showcasing the ground-breaking Swarm45 terminal at DSEI this year.

Integrating the latest in VSAT technology, the Swarm45 offers the simplicity of BGAN with the high-throughput of VSAT.

The SWaP (Size, Weight and Power) of the terminal is set to revolutionise the application flexibility of portable satellite communications.

Packing down into a lightweight backpack or hard case, it is small and light enough to be transported as airline hand luggage - a unique feature for a high-throughput VSAT.

Deployment is fast and straightforward, with setup achievable in an astonishing 90 seconds. Even an unskilled operator can then be on the air in around 240 seconds. This is thanks to the PIM (Paradigm Interface Module), a common terminal controller which uses innovative and intuitive audio and visual cues. Pointing is quick and simple with no need for external pointing tools or a laptop.

The Swarm45 is commercially agile, configurable for Mil-Ka, Ka, Ku and X-Band frequencies. It is operational on a range of high-throughput satellite networks including Global Xpress, Avanti, Intelsat Epic and Telenor's Thor 7.

Paradigm Communication Systems Ltd.

Paradigm House, 14 Wilsom Road, Alton, Hampshire, GU34 2PP, UK

It has been swiftly adopted by the international military and government community for mobile and covert deployment but is equally suited to the disaster recovery, NGO and broadcast sectors.

“It’s exciting to see the reaction of our customers when they realise how quickly and easily they can be on air with the Swarm45. It aligns extremely well with military users’ demands for flexibility and ease of interaction” said Ulf Sandberg, Managing Director at Paradigm.

Come and see the Swarm45 along with Paradigm’s other products and solutions on stand N9-501 and view www.paracomm.co.uk or our ParadigmTV channel at <https://www.youtube.com/c/ParacommUK>

About Paradigm

Paradigm provides optimal, innovative and reliable satellite communication and control solutions at a competitive price.

Paradigm is a UK-based, independent and privately owned company with Europe’s largest satcom warehouse. Incorporating an extensive logistics capability, Paradigm is able to deliver extremely efficient and cost-effective global services and unique solutions, from the provision of satcom equipment and terminals to the design and installation of complete turnkey systems.

Paradigm has extensive engineering experience designing and delivering customised satellite terminals and earth stations for a wide range of industries and sectors, developing close relationships with customers, and giving valuable insight into their key requirements.
