

PRESS RELEASE

Paradigm and Kymeta Announce Partnership

ALTON, UK - October 22 - Kymeta and Paradigm have partnered to create an enhanced portable terminal solution for military and emergency responder customers called the MANTA. The MANTA, which integrates the Kymeta™ KyWay™ terminal together with Paradigm's Interface Module (PIM®) controller, offers increased capabilities to users needing reliable communications on-the-move. Military and first responder users who need connectivity for remote incident response, in urban environments where existing infrastructure is compromised, or elsewhere in the world where operations demand reliable communications now have a rugged, easily transportable, and mobile connectivity solution.

The MANTA is a one case, all-inclusive solution and needs just one cable (to connect power). The system can operate out of the case or be put onto a vehicle roof in a matter of minutes and eliminates the need for complicated wiring and rack-mounting components. The MANTA is now shipping with an iDirect X7 modem and can support modems from various suppliers. Kymeta KĀLO™ network connectivity services can also be bundled with the solution for complete global coverage.

The partnership marks a strong collaboration between two of the most innovative players in the mobile satellite communications market. The KyWay terminal is an industry-first solution and the world's only commercially-available, flat-panel, electronically-steered satellite terminal. The PIM® terminal controller has a proven track record from its existing integration into a range of satellite terminals.

"With Paradigm PIM-enabling the Kymeta antenna, we will create superior solutions. We are looking forward to working with Kymeta and revolutionising SATCOM-on-the-move." commented Ulf Sandberg, Managing Director, Paradigm.

"The new KyWay terminal and PIM technology solution is ideally suited to the mobile military, government, and emergency responder sectors, and Kymeta is excited about the advances and flexibility that the new MANTA terminal solution will bring to the market," said David Harrower, Senior Vice President of Global Sales, Kymeta.

About Paradigm

Paradigm provides optimal, innovative and reliable satellite communication and control solutions at a competitive price.

Paradigm is a UK-based, independent and privately owned company with Europe's largest satcom warehouse. Incorporating an extensive logistics capability, Paradigm is able to deliver extremely efficient and cost-effective global services and unique solutions, from the provision of satcom equipment and terminals to the design and installation of complete turnkey systems.

Paradigm has extensive engineering experience designing and delivering customised satellite terminals and earth stations for a wide range of industries and sectors, developing close relationships with customers, and giving valuable insight into their key requirements.

About Kymeta

The world's demand for ubiquitous mobile connectivity is irrefutable. A global, mobile network is the answer to connecting people and places that have never been connected before.

Kymeta is making seamless, always-connected mobile communications possible across satellite and cellular networks to deliver a single, global, mobile network. End-to-end mobile communications are delivered with Kymeta KĀLO™ connectivity services, and the only commercially-available, electronically-steered, flat-panel satellite terminal that goes places traditional satellite antennas cannot. Backed by U.S. and international patents and licenses, the Kymeta KyWay™ satellite terminal makes high-throughput, mobile communications possible in cars, trains, buses, trucks, boats, and much more.

If it moves, Kymeta keeps it connected.
